

Brayan Londono

Tampa, FL • (813) 407-0629 • brayanlondono.pm@gmail.com • linkedin.com/in/brayan-londono

- 5+ years as a healthcare PM building cross-system workflows (EDI claims, pre-cert, care coordination, transitions of care)
- Redesigned psychiatric intake end-to-end: cut admission wait times from 4hrs to 45min
- Diagnosed underutilization via cohort analytics; improved trial-to-paid conversion 40% to 60%
- Scaled AI-powered product to 20K users & \$48k ARR
- Deep domain: payer ops, insurance verification, value-based care

HEALTHCARE & PRODUCT EXPERIENCE

Claire Health (www.getclairehealth.com)

Co-Founder (Project)

Built a real-time healthcare navigation platform for self-funded employers that reduces claims costs by steering employees to lower-cost, in-network care.

- Own end-to-end workflow strategy for a healthcare cost navigation platform, defining cross-system workflows spanning claims ingestion, facility matching, pre-certification intercept, and employee notification.
- Built integrated workflows across EDI 270/271/835/837 pipelines, CPT-based cost-ranking, geocoded facility deduplication, and real-time monitoring, partnering with engineering to ensure scalable architecture aligned with workflow requirements.
- Designed an event-driven pre-certification intercept workflow triggered by medical management notifications, performing real-time facility search and routing lower-cost options to employees before authorization completion.
- Drove workflow adoption in a 220-employee pilot with Meshoppen Stone, defining PMPM savings and utilization metrics, diagnosing adoption barriers through HR and broker interviews, and achieving 40% redirect acceptance with \$1K/employee annual savings.
- Created PRDs and workflow documentation with clear requirements and expected outcomes, partnering with engineering in 2-week sprints using GitHub Projects to evaluate build vs. buy decisions for claims parsing, SMS, geocoding, and cost-ranking components.
- Established a data-driven feedback loop tracking user and claims events in Airtable, measuring utilization by employer, and translating usage insights into product changes.
- Led go-to-market through flat PEPM pricing with performance-based savings, ROI modeling decks, targeted outbound and LinkedIn outreach, broker partnership development, and TPA integration channels.

Resume Tailor

06/2023 - Present

Co-Founder & Product Manager

Built an AI job search product from zero to 20K users and \$48K ARR. Own product, roadmap, and work directly with engineering.

- Scaled an AI job search product to 20,000 users and \$48K ARR, owning product strategy, roadmap prioritization via RICE scoring, and engineering partnership through structured PRDs and Jira sprint planning.
- Diagnosed post-resume churn and underutilization using PostHog retention cohort analysis, session replay (LogRocket), and Sentry error tracking, translating usage data into targeted product changes that increased trial-to-paid conversion from 40% to 60%.
- Reduced trial leakage by implementing 40+ typed client and server events in PostHog, redesigning onboarding through feature-level tracking and usage gating, and removing underutilized features validated by 90% single-use retention curves.

- Conducted 50+ user interviews using Mom Test and JTBD frameworks, synthesizing insights via affinity mapping to identify adoption barriers, increasing weekly active users to 150.
- Built programmatic SEO, CRM (HubSpot), UTM tracking, and outbound automation (Apollo/Reply.io), optimizing acquisition funnels with PostHog and Search Console.

Acadia Healthcare

01/2017 - 02/2020

Admissions Coordinator

First point of contact for patients in psychiatric crisis, like involuntary holds, active detox, and acute behavioral episodes. Worked across inpatient psych, detox, and military units.

- Managed psychiatric crisis intake across inpatient, detox, and military units, coordinating patients, families, nurses, and physicians through real-time triage and placement decisions.
- Rebuilt the end-to-end insurance verification and intake workflow including benefits checks, screening, bed assignment, and payer coordination, cutting admission wait times from 4 hours to 45 minutes through workflow optimization and operational process redesign.

VENTURE CAPITAL & ADVISORY

TampaBay.Ventures

10/2022 - 06/2023

Venture Capital Analyst

- Sourced and closed a \$5M allocation toward Betr's \$35M Series A-2, underwriting risk using cohort-based LTV/CAC models and Monte Carlo simulation, and rebuilding investor materials including projections and data room structure.
- Identified onboarding friction at a portfolio company by reviewing Mixpanel funnel data and cohort metrics, isolating activation bottlenecks, and redesigning onboarding flows.

EY

06/2022 - 08/2022

Venture Analyst

- Conducted product validation for CoachConvo by interviewing banking staff to identify workflow pain points, translating insights into AI-driven training scenarios adopted by Bank of America's sales team, increasing second-meeting conversion by 40%.

EDUCATION

BS in Econometrics & Quantitative Economics

University of South Florida

SKILLS

Product: Workflow Design & Optimization, PRDs & Requirements, Cross-Functional Leadership, Adoption & Utilization Metrics, A/B Testing, Funnel Optimization, Product Roadmapping, Systems Thinking, Usability Testing, User Research

Healthcare: EDI 270/271 & 835/837, Pre-Certification Workflows, Care Coordination & Transitions, Insurance Verification, Benefits Administration, TPA Coordination, Medical Management, Payer Operations

Tools: Jira, PostHog, Mixpanel, Figma, Python, JavaScript/TypeScript, React, Node, OpenAI/ChatGPT, GitHub Projects, HubSpot CRM, Google Analytics
