Tampa, FL • (813) 407-0629 • brayanlondono.pm@gmail.com • linkedin.com/in/brayan-londono

Former crisis psych admissions coordinator turned product builder. Three years as the first person patients saw during involuntary holds, active detox, and acute psychiatric episodes. Now I build healthcare and AI products. Co-founded Claire Health, a digital healthcare navigation platform that hooks into EDI transmissions to steer employees to lower-cost care. Co-founded Resume Tailor, shipped to 20K users and \$48K ARR.

HEALTHCARE & PRODUCT EXPERIENCE

Claire Health (www.getclairehealth.com)

Co-Founder (Project)

Built a real-time healthcare navigation platform for self-funded employers that reduces claims costs by steering employees to lower-cost, in-network care.

- Platform monitors EDI 270/271 eligibility transmissions and 835/837 claims data to flag high-cost procedures in real time, then redirects care through the employer's TPA or medical management team to lower-cost sites.
- Built the pre-certification intercept workflow: Claire catches scheduled procedures before authorization completes and surfaces lower-cost alternatives via text to employees while they're still deciding.
- Ran a pilot with Meshoppen Stone (220 employees). \$1K MRR.
- Own product strategy, roadmap, and go-to-market. Work directly with engineering.

Resume Tailor

06/2023 - Present

Co-Founder & Product Manager

Built an AI job search product from zero to 20K users and \$48K ARR. Own product, roadmap, and work directly with engineering.

- Ran 50+ user interviews. Key insight: users weren't avoiding the product because it didn't work. They were avoiding job searching because rejection hurts. Repositioned the product around that.
- Built recruiter outreach after noticing users churned once their resume was done. 25% of actives now use it weekly.
- Trial conversion was leaking at 60%. Rebuilt the flow so users could act on insights in one click. Leak dropped to 35%.
- Killed mock interviews after 6 weeks. 90% tried it once, almost nobody came back. Moved the team to features that actually retained.

Acadia Healthcare

01/2017 - 02/2020

Admissions Coordinator

First point of contact for patients in psychiatric crisis, like involuntary holds, active detox, and acute behavioral episodes. Worked across inpatient psych, detox, and military units.

- Coordinated between patients, families, nurses, and physicians to translate clinical complexity (symptoms, acuity, diagnoses) into fast care placement decisions.
- Rebuilt the insurance verification workflow end to end. Admission wait times dropped from 3–4 hours to 45 minutes. Claim approval rates increased.
- Managed the full intake process: benefits verification, clinical screening, bed assignment, and family communication across multiple payer types and plan structures.

VENTURE CAPITAL & ADVISORY

TampaBay.Ventures

10/2022 - 06/2023

Venture Capital Analyst

- Sourced and executed a \$5M allocation toward Betr's \$35M Series A-2 (Jake Paul's sports betting company). Took the company's deck, financials, data room and rebuilt them into an investor-ready package. Built the presentation, structured the data room, and pitched LPs directly.
- Spotted onboarding friction at a portfolio company by mapping their user flow. Reduced churn 10% and made it into their Series A-2 deck.

EY

06/2022 - 08/2022

Venture Analyst

- Ran product validation for CoachConvo, an AI soft-skills training platform. Interviewed banking staff about their actual daily conversations: what was hard, what they avoided, what made them anxious.
- Turned those interviews into training scenarios the sales team used with Bank of America. Second meeting conversion increased 40%.

Ballast Point Ventures

05/2021 - 01/2022

Intern

- Identified a gap in PBM cost transparency that no existing product addressed. Built a working prototype and pitched the investment team on the opportunity.
- Supported deal sourcing, financial modeling, and founder outreach.

EDUCATION

BS in Econometrics & Quantitative Economics

University of South Florida

SKILLS

Product: A/B Testing, Cross-Functional Leadership, Funnel Optimization, PRDs & Specs, Product Roadmapping, Success Metrics Definition, Usability Testing, User Interviews, User Research
